- Rohit Pal

Education

- 2018-2022
- Chandigarh Engineering College Landran
Mohali Punjab
- B.tech (Information Technology)

SKILLS

- ASP.NET&MVC,
- .NET Core,
- WebForms,
- Store Procedure,
- SQL
- Normalization,
- WebAPIs,
- Ajax,
- JSON,
- XML,
- SQLComplex Query,
- Testing & Debugging
- RESTful API
- (.NET Core).

Languages

C#, Javascript, TypeScript, Kotlin, Java,
Html, Css, Bootstrap, TailwindCss

Frameworks

- Asp.net
- Android Studio
- Angular 18
- Sql -Server

Databases

- Ms-Sql
- MySql

COURSES & CERTIFICATIONS

- Android Auto Development
- Internship java developement

Hobbies:

Playing Cricket
Watching Cricket

PROFILE SUMMARY

Experienced Android developer with a designing and developing scalable APIs using .NET technologies. Currently transitioning to a full-stack .NET developer role, leveraging hands-on experience with ASP.NET Core, REST API development, and robust database management. Skilled in creating efficient, user-friendly applications and collaborating in agile environments to deliver impactful solutions. Proficient in both mobile and web application development with a commitment to continuous learning and growth.

WORKEXPERIENCE:

Orasis Infotech Pvt. Ltd Noida Uttar Pradesh

Android and .Net Api Developer Oct 2023 - Aug2024

- Designed and developed Android applications from scratch,handling both frontend(UI/UX) and backend development to deliver full-featured mobile solutions.
- Built intuitive and responsive user interfaces using XML layouts and Jetpack Compose,ensuring seamless user experiences across devices.
- Developed robust RESTful APIs using ASP.NET Core,enabling secure data exchange between the app and backend services.
- Integrated Firebase services(Authentication,Firestore,RealtimeDatabase) to manage user data,push notifications,andanalytics.

Project

OnLine Job Portal

- Designed and implemented a responsive web application using Angular18 for the front end,enhancing user experience and performance.
- Developed a RESTful Web API with ASP.NET Core and Entity FrameworkCore,enabling efficient data management and interaction with SQL Server.
- Integrated user authentication (signup/login) with JWT-based security,safe guarding data and providing role-based access control for job seekers and employers.
- Built CRUD operations for job posts,applications,and user profiles,enabling seamlessdata management.
- Optimized API performance by implementing efficient SQL queries and database indexing,reducing response times by30%.
- Developed dynamic dashboards for admin users to track job postings,user activity,and analytics.
- Implemented file upload functionality for resumes using Angular forms and .NET API,enhancing applicant profiles.

Blog Application

- Built a responsive blog platform using Angular18 for the frontend,ensuring a seamless and engaging user experience across devices.
- Implemented CRUD operations for blog posts,comments,and categories,enhancing user engagement and content management.
- Optimized database performance by leveraging Entity Framework LINQ queries and code-first migrations,reducing query execution time by 20%.
- Developeduserprofilepageswiththeabilityto manageposts,drafts,and viewblog analytics.

HotelManagement

- Designed and developed a web-based hotel management system using ASP.NET Core MVC,ensuring a clean and intuitive user interface.
- Utilized Entity Framework Core for database interactions,enabling efficient management of guests,reservations,and services.
- Integrated role-based authentication and authorization,allowing secure access for hotel staff, managers,and admins.
- Built dynamic dashboards to display real-time booking stats,occup
